July 26, 2013

The Honorable John Rockefeller
Chairman
Committee on Commerce, Science and
Transportation
United States Senate
Washington, DC 20510

The Honorable John Thune
Ranking Member
Committee on Commerce, Science and
Transportation
United States Senate
Washington, DC 20510

Dear Chairman Rockefeller and Ranking Member Thune:

Thank you for your continued leadership and dedication on cybersecurity matters. Motorola Solutions shares your vision that real cybersecurity requires coordinated actions by many, including industry, government and the users themselves. I am writing to express Motorola Solutions' support for S. 1353, The Cybersecurity Act of 2013. We commend your introduction of legislation that emphasizes the continued importance of public/private partnerships in addressing improved cybersecurity.

Also, we concur that the National Institute of Standards and Technology (NIST) is best suited to collaborate with industry and champion the development of voluntary, industry-led set standards, guidelines, and best practices. We believe the voluntary approach of your legislation that includes incentives to encourage adoption is an important first step. Leveraging existing organizations and capabilities, aligning R&D and establishing education and training goals will make the effort immediately actionable.

Motorola Solutions continues to promote real-time information sharing between the public and private sector as a critical capability for the security of our nation's core critical infrastructure.

We look forward to working with you as the legislation progresses. In the meantime, should you need any additional information, please have your staff contact Lynn Starr at (202) 371-6915 or lynn.starr@motorolasolutions.com.

Sincerely,

Domingo S. Herraiz
Vice President
North American Government Affairs
