To ensure the continued free flow of commerce within the United States and with its global trading partners through secure cyber communications, to provide for the continued development and exploitation of the Internet and intranet communications for such purposes, to provide for the development of a cadre of information technology specialists to improve and maintain effective cyber security defenses against disruption, and for other purposes.

IN THE SENATE OF THE UNITED STATES

APRIL 1, 2009

Mr. ROCKEFELLER (for himself, Ms. SNOWE, and Mr. NELSON of Florida) introduced the following bill; which was read twice and referred to the Committee on Commerce, Science, and Transportation

APRIL ——, 2010

Reported by Mr. ROCKEFELLER with an amendment in the nature of a substitute

[Strike all after the enacting clause and insert the part printed in italic]

A BILL

To ensure the continued free flow of commerce within the United States and with its global trading partners through secure cyber communications, to provide for the continued development and exploitation of the Internet and intranet communications for such purposes, to provide for the development of a cadre of information technology specialists to improve and maintain effective cy-
bersecurity defenses against disruption, and for other purposes.

Be it enacted by the Senate and House of Representa-
tives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) Short Title.—This Act may be cited as the “Cybersecurity Act of 2009”.

(b) Table of Contents.—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Findings.
Sec. 3. Cybersecurity Advisory Panel.
Sec. 4. Real-time cybersecurity dashboard.
Sec. 5. State and regional cybersecurity enhancement program.
Sec. 6. NIST standards development and compliance.
Sec. 7. Licensing and certification of cybersecurity professionals.
Sec. 8. Review of NTIA domain name contracts.
Sec. 9. Secure domain name addressing system.
Sec. 10. Promoting cybersecurity awareness.
Sec. 11. Federal cybersecurity research and development.
Sec. 12. Federal Cyber Scholarship for Service program.
Sec. 13. Cybersecurity competition and challenge.
Sec. 15. Cybersecurity risk management report.
Sec. 16. Legal framework review and report.
Sec. 17. Authentication and civil liberties report.
Sec. 18. Cybersecurity responsibilities and authorities.
Sec. 19. Quadrennial cyber review.
Sec. 20. Joint intelligence threat assessment.
Sec. 21. International norms and cybersecurity deterrence measures.
Sec. 22. Federal Secure Products and Services Acquisitions Board.
Sec. 23. Definitions.

SEC. 2. FINDINGS.

The Congress finds the following:

(1) America’s failure to protect cyberspace is one of the most urgent national security problems facing the country.
(2) Since intellectual property is now often stored in digital form, industrial espionage that exploits weak cybersecurity dilutes our investment in innovation while subsidizing the research and development efforts of foreign competitors. In the new global competition, where economic strength and technological leadership are vital components of national power, failing to secure cyberspace puts us at a disadvantage.

(3) According to the 2009 Annual Threat Assessment, “a successful cyber attack against a major financial service provider could severely impact the national economy, while cyber attacks against physical infrastructure computer systems such as those that control power grids or oil refineries have the potential to disrupt services for hours or weeks” and that “Nation states and criminals target our government and private sector information networks to gain competitive advantage in the commercial sector.”

(4) The Director of National Intelligence testified before the Congress on February 19, 2009, that “a growing array of state and non-state adversaries are increasingly targeting for exploitation and potentially disruption of destruction—our information in-
Infrastructure, including the Internet, telecommunications networks, computer systems, and embedded processors and controllers in critical industries” and these trends are likely to continue.

(5) John Brennan, the Assistant to the President for Homeland Security and Counterterrorism wrote on March 2, 2009, that “our nation’s security and economic prosperity depend on the security, stability, and integrity of communications and information infrastructure that are largely privately-owned and globally-operated.”

(6) Paul Kurtz, a Partner and chief operating officer of Good Harbor Consulting as well as a senior advisor to the Obama Transition Team for cybersecurity, recently stated that the United States is unprepared to respond to a “cyber-Katrina” and that “a massive cyber disruption could have a cascading, long-term impact without adequate co-ordination between government and the private sector.”

(7) The Cyber Strategic Inquiry 2008, sponsored by Business Executives for National Security and executed by Booz Allen Hamilton, recommended to “establish a single voice for cybersecurity within government” concluding that the “unique nature of cybersecurity requires a new leadership paradigm.”
Alan Paller, the Director of Research at the SANS Institute, testified before the Congress that "the fight against cybercrime resembles an arms race where each time the defenders build a new wall, the attackers create new tools to scale the wall. What is particularly important in this analogy is that, unlike conventional warfare where deployment takes time and money and is quite visible, in the cyber world, when the attackers find a new weapon, they can attack millions of computers; and successfully infect hundreds of thousands; in a few hours or days, and remain completely hidden."

According to the February 2003 National Strategy to Secure Cyberspace, "our nation’s critical infrastructures are composed of public and private institutions in the sectors of agriculture, food, water, public health, emergency services, government, defense industrial base, information and telecommunications, energy, transportation, banking finance, chemicals and hazardous materials, and postal and shipping. Cyberspace is their nervous system—the control system of our country” and that “the cornerstone of America’s cyberspace security strategy is and will remain a public-private partnership."
According to the National Journal, Mike McConnell, the former Director of National Intelligence, told President Bush in May 2007 that if the 9/11 attackers had chosen computers instead of airplanes as their weapons and had waged a massive assault on a U.S. bank, the economic consequences would have been “an order of magnitude greater” than those caused by the physical attack on the World Trade Center. Mike McConnell has subsequently referred to cybersecurity as the “soft underbelly of this country.”

The Center for Strategic and International Studies report on Cybersecurity for the 44th Presidency concluded that (A) cybersecurity is now a major national security problem for the United States; (B) decisions and actions must respect privacy and civil liberties; and (C) only a comprehensive national security strategy that embraces both the domestic and international aspects of cybersecurity will make us more secure. The report continued stating that the United States faces “a long-term challenge in cyberspace from foreign intelligence agencies and militaries, criminals, and others; and that losing this struggle will wreak serious damage
on the economic health and national security of the United States.”

(12) James Lewis, Director and Senior Fellow, Technology and Public Policy Program, Center for Strategic and International Studies, testified on behalf of the Center for Strategic and International Studies that “the United States is not organized and lacks a coherent national strategy for addressing” cybersecurity.

(13) President Obama said in a speech at Purdue University on July 16, 2008, that “every American depends—directly or indirectly—on our system of information networks. They are increasingly the backbone of our economy and our infrastructure; our national security and our personal well-being. But it’s no secret that terrorists could use our computer networks to deal us a crippling blow. We know that cyber-espionage and common crime is already on the rise. And yet while countries like China have been quick to recognize this change, for the last eight years we have been dragging our feet.” Moreover, President Obama stated that “we need to build the capacity to identify, isolate, and respond to any cyber-attack.”
(14) The President’s Information Technology Advisory Committee reported in 2005 that software is a major vulnerability and that “software development methods that have been the norm fail to provide the high-quality, reliable, and secure software that the IT infrastructure requires. . . . Today, as with cancer, vulnerable software can be invaded and modified to cause damage to previously healthy software, and infected software can replicate itself and be carried across networks to cause damage in other systems.”

SEC. 3. CYBERSECURITY ADVISORY PANEL.

(a) In general.—The President shall establish or designate a Cybersecurity Advisory Panel.

(b) Qualifications.—The President—

(1) shall appoint as members of the panel representatives of industry, academic, non-profit organizations; interest groups and advocacy organizations; and State and local governments who are qualified to provide advice and information on cybersecurity research, development, demonstrations; education, technology transfer, commercial application; or societal and civil liberty concerns; and

(2) may seek and give consideration to recommendations from the Congress, industry, the cy-
bersecurity community, the defense community, State and local governments, and other appropriate organizations.

(e) DUTIES.—The panel shall advise the President on matters relating to the national cybersecurity program and strategy and shall assess—

(1) trends and developments in cybersecurity science research and development;

(2) progress made in implementing the strategy;

(3) the need to revise the strategy;

(4) the balance among the components of the national strategy, including funding for program components;

(5) whether the strategy, priorities, and goals are helping to maintain United States leadership and defense in cybersecurity;

(6) the management, coordination, implementation, and activities of the strategy; and

(7) whether societal and civil liberty concerns are adequately addressed.

(d) REPORTS.—The panel shall report, not less frequently than once every 2 years, to the President on its assessments under subsection (e) and its recommendations for ways to improve the strategy.
(o) Travel Expenses of Non-Federal Members.—Non-Federal members of the panel, while attending meetings of the panel or while otherwise serving at the request of the head of the panel while away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for individuals in the government serving without pay. Nothing in this subsection shall be construed to prohibit members of the panel who are officers or employees of the United States from being allowed travel expenses, including per diem in lieu of subsistence, in accordance with law.

(f) Exemption From FACA Sunset.—Section 14 of the Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Advisory Panel.

SEC. 4. REAL-TIME CYBERSECURITY DASHBOARD.

The Secretary of Commerce shall—

(1) in consultation with the Office of Management and Budget, develop a plan within 90 days after the date of enactment of this Act to implement a system to provide dynamic, comprehensive, real-time cybersecurity status and vulnerability information of all Federal Government information systems and networks managed by the Department of Commerce; and
(2) implement the plan within 1 year after the
date of enactment of this Act.

SEC. 5. STATE AND REGIONAL CYBERSECURITY ENHANCE-
MENT PROGRAM.

(a) CREATION AND SUPPORT OF CYBERSECURITY
CENTERS.—The Secretary of Commerce shall provide as-
sistance for the creation and support of Regional Cyberse-
curity Centers for the promotion and implementation of
cybersecurity standards. Each Center shall be affiliated
with a United States-based nonprofit institution or organi-
zation; or consortium thereof, that applies for and is
awarded financial assistance under this section.

(b) PURPOSE.—The purpose of the Centers is to en-
hance the cybersecurity of small and medium sized busi-
nesses in United States through—

(1) the transfer of cybersecurity standards,
processes, technology, and techniques developed at
the National Institute of Standards and Technology
to Centers and, through them, to small and me-
dium-sized companies throughout the United States;

(2) the participation of individuals from industry,
universities, State governments, other Federal
agencies, and, when appropriate, the Institute in co-
operative technology transfer activities;
(3) efforts to make new cybersecurity technology, standards, and processes usable by United States-based small- and medium-sized companies;

(4) the active dissemination of scientific, engineering, technical, and management information about cybersecurity to industrial firms, including small- and medium-sized companies; and

(5) the utilization, when appropriate, of the expertise and capability that exists in Federal laboratories other than the Institute.

(c) Activities.—The Centers shall—

(1) disseminate cybersecurity technologies, standard, and processes based on research by the Institute for the purpose of demonstrations and technology transfer;

(2) actively transfer and disseminate cybersecurity strategies, best practices, standards, and technologies to protect against and mitigate the risk of cyber attacks to a wide range of companies and enterprises, particularly small- and medium-sized businesses; and

(3) make loans, on a selective, short-term basis, of items of advanced cybersecurity countermeasures to small businesses with less than 100 employees.
(a) Duration and Amount of Support; Program Descriptions; Applications; Merit Review; Evaluations of Assistance.—

(1) Financial Support.—The Secretary may provide financial support, not to exceed 50 percent of its annual operating and maintenance costs, to any Center for a period not to exceed 6 years (except as provided in paragraph (5)(D)).

(2) Program Description.—Within 90 days after the date of enactment of this Act, the Secretary shall publish in the Federal Register a draft description of a program for establishing Centers and, after a 30-day comment period, shall publish a final description of the program. The description shall include—

(A) a description of the program;

(B) procedures to be followed by applicants;

(C) criteria for determining qualified applicants;

(D) criteria, including those described in paragraph (4), for choosing recipients of financial assistance under this section from among the qualified applicants; and
(E) maximum support levels expected to be available to Centers under the program in the fourth through sixth years of assistance under this section.

(3) APPLICATIONS; SUPPORT COMMITMENT.— Any nonprofit institution, or consortia of nonprofit institutions, may submit to the Secretary an application for financial support under this section, in accordance with the procedures established by the Secretary. In order to receive assistance under this section, an applicant shall provide adequate assurances that it will contribute 50 percent or more of the proposed Center’s annual operating and maintenance costs for the first 3 years and an increasing share for each of the next 3 years.

(4) AWARD CRITERIA.—Awards shall be made on a competitive, merit-based review. In making a decision whether to approve an application and provide financial support under this section, the Secretary shall consider, at a minimum—

(A) the merits of the application, particularly those portions of the application regarding technology transfer, training and education, and adaptation of cybersecurity technologies to the needs of particular industrial sectors;
(B) the quality of service to be provided;
(C) geographical diversity and extent of service area; and
(D) the percentage of funding and amount of in-kind commitment from other sources.

(5) THIRD YEAR EVALUATION.—

(A) IN GENERAL.—Each Center which receives financial assistance under this section shall be evaluated during its third year of operation by an evaluation panel appointed by the Secretary:

(B) EVALUATION PANEL.—Each evaluation panel shall be composed of private experts, none of whom shall be connected with the involved Center, and Federal officials. An official of the Institute shall chair the panel. Each evaluation panel shall measure the Center’s performance against the objectives specified in this section.

(C) POSITIVE EVALUATION REQUIRED FOR CONTINUED FUNDING.—The Secretary may not provide funding for the fourth through the sixth years of a Center’s operation unless the evaluation by the evaluation panel is positive. If the evaluation is positive, the Secretary may pro-
vide continued funding through the sixth year at declining levels.

(D) FUNDING AFTER SIXTH YEAR.—After the sixth year, the Secretary may provide additional financial support to a Center if it has received a positive evaluation through an independent review, under procedures established by the Institute. An additional independent review shall be required at least every 2 years after the sixth year of operation. Funding received for a fiscal year under this section after the sixth year of operation may not exceed one third of the annual operating and maintenance costs of the Center.

(6) PATENT RIGHTS TO INVENTIONS.—The provisions of chapter 18 of title 35, United States Code, shall (to the extent not inconsistent with this section) apply to the promotion of technology from research by Centers under this section except for contracts for such specific technology extension or transfer services as may be specified by statute or by the President, or the President’s designee.

(d) ACCEPTANCE OF FUNDS FROM OTHER FEDERAL DEPARTMENTS AND AGENCIES.—In addition to such sums as may be authorized and appropriated to the Sec-
retary and President, or the President's designee, to oper-
ate the Centers program, the Secretary and the President,
or the President's designee, also may accept funds from
other Federal departments and agencies for the purpose
of providing Federal funds to support Centers. Any Center
which is supported with funds which originally came from
other Federal departments and agencies shall be selected
and operated according to the provisions of this section.

SEC. 6. NIST STANDARDS DEVELOPMENT AND COMPLI-
ANCE.

(a) IN GENERAL.—Within 1 year after the date of
enactment of this Act, the National Institute of Standards
and Technology shall establish measurable and auditable
cybersecurity standards for all Federal Government, gov-
ernment contractor, or grantee critical infrastructure in-
formation systems and networks in the following areas:

(1) CYBERSECURITY METRICS RESEARCH.—The
Director of the National Institute of Standards and
Technology shall establish a research program to de-
velop cybersecurity metrics and benchmarks that can
assess the economic impact of cybersecurity. These
metrics should measure risk reduction and the cost
of defense. The research shall include the develop-
ment automated tools to assess vulnerability and
compliance.
(2) Security controls.—The Institute shall establish standards for continuously measuring the effectiveness of a prioritized set of security controls that are known to block or mitigate known attacks.

(3) Software security.—The Institute shall establish standards for measuring the software security using a prioritized list of software weaknesses known to lead to exploited and exploitable vulnerabilities. The Institute will also establish a separate set of such standards for measuring security in embedded software such as that found in industrial control systems.

(4) Software configuration specification language.—The Institute shall establish standard computer-readable language for completely specifying the configuration of software on computer systems widely used in the Federal Government, by government contractors and grantees, and in private sector owned critical infrastructure information systems and networks.

(5) Standard software configuration.—The Institute shall establish standard configurations consisting of security settings for operating system software and software utilities widely used in the Federal Government, by government contractors and
grantees, and in private sector owned critical infrastructure information systems and networks.

(6) Vulnerability Specification Language.—The Institute shall establish standard computer-readable language for specifying vulnerabilities in software to enable software vendors to communicate vulnerability data to software users in real time.

(7) National Compliance Standards for All Software.—

(A) Protocol.—The Institute shall establish a standard testing and accreditation protocol for software built by or for the Federal Government, its contractors, and grantees, and private sector owned critical infrastructure information systems and networks, to ensure that it—

(i) meets the software security standards of paragraph (2); and

(ii) does not require or cause any changes to be made in the standard configurations described in paragraph (4).

(B) Compliance.—The Institute shall develop a process or procedure to verify that—
• software development organizations
comply with the protocol established under
subparagraph (A) during the software de-
velopment process; and

(ii) testing results showing evidence of
adequate testing and defect reduction are
provided to the Federal Government prior
to deployment of software.

(b) CRITERIA FOR STANDARDS.—Notwithstanding
any other provision of law (including any Executive
Order), rule, regulation, or guideline, in establishing
standards under this section, the Institute shall disregard
the designation of an information system or network as
a national security system or on the basis of presence of
classified or confidential information, and shall establish
standards based on risk profiles.

(e) INTERNATIONAL STANDARDS.—The Director,
through the Institute and in coordination with appropriate
Federal agencies, shall be responsible for United States
representation in all international standards development
related to cybersecurity, and shall develop and implement
a strategy to optimize the United States position with re-
spect to international cybersecurity standards.

(d) COMPLIANCE ENFORCEMENT.—The Director
shall—
(1) enforce compliance with the standards developed by the Institute under this section by software manufacturers, distributors, and vendors; and

(2) shall require each Federal agency, and each operator of an information system or network designated by the President as a critical infrastructure information system or network, periodically to demonstrate compliance with the standards established under this section.

(e) FCC NATIONAL BROADBAND PLAN.—In developing the national broadband plan pursuant to section 6001(k) of the American Recovery and Reinvestment Act of 2009, the Federal Communications Commission shall report on the most effective and efficient means to ensure the cybersecurity of commercial broadband networks, including consideration of consumer education and outreach programs.

SEC. 7. LICENSING AND CERTIFICATION OF CYBERSECURITY PROFESSIONALS.

(a) IN GENERAL.—Within 1 year after the date of enactment of this Act, the Secretary of Commerce shall develop or coordinate and integrate a national licensing, certification, and periodic recertification program for cybersecurity professionals.
(b) MANDATORY LICENSING. — Beginning 3 years after the date of enactment of this Act, it shall be unlawful for any individual to engage in business in the United States, or to be employed in the United States, as a provider of cybersecurity services to any Federal agency or an information system or network designated by the President, or the President's designee, as a critical infrastructure information system or network, who is not licensed and certified under the program.

SEC. 8. REVIEW OF NTIA DOMAIN NAME CONTRACTS.

(a) In General. — No action by the Assistant Secretary of Commerce for Communications and Information after the date of enactment of this Act with respect to the renewal or modification of a contract related to the operation of the Internet Assigned Numbers Authority, shall be final until the Advisory Panel—

(1) has reviewed the action;

(2) considered the commercial and national security implications of the action; and

(3) approved the action.

(b) Approval Procedure. — If the Advisory Panel does not approve such an action, it shall immediately notify the Assistant Secretary in writing of the disapproval and the reasons therefor. The Advisory Panel may provide recommendations to the Assistant Secretary in the notice.
for any modifications the it deems necessary to secure ap-
proval of the action.

SEC. 9. SECURE DOMAIN NAME ADDRESSING SYSTEM.

(a) In General.—Within 3 years after the date of
enactment of this Act, the Assistant Secretary of Com-
merce for Communications and Information shall develop
a strategy to implement a secure domain name addressing
system. The Assistant Secretary shall publish notice of the
system requirements in the Federal Register together with
an implementation schedule for Federal agencies and in-
formation systems or networks designated by the Presi-
dent, or the President’s designee, as critical infrastructure
information systems or networks:

(b) Compliance Required.—The President shall
ensure that each Federal agency and each such system
or network implements the secure domain name address-
ing system in accordance with the schedule published by
the Assistant Secretary:

SEC. 10. PROMOTING CYBERSECURITY AWARENESS.
The Secretary of Commerce shall develop and imple-
ment a national cybersecurity awareness campaign that—
(1) is designed to heighten public awareness of
cybersecurity issues and concerns;
(2) communicates the Federal Government’s
role in securing the Internet and protecting privacy.
and civil liberties with respect to Internet-related activities; and
(3) utilizes public and private sector means of providing information to the public, including public service announcements.

SEC. 11. FEDERAL CYBERSECURITY RESEARCH AND DEVELOPMENT.

(a) FUNDAMENTAL CYBERSECURITY RESEARCH—
The Director of the National Science Foundation shall give priority to computer and information science and engineering research to ensure substantial support is provided to meet the following challenges in cybersecurity:

(1) How to design and build complex software-intensive systems that are secure and reliable when first deployed.

(2) How to test and verify that software, whether developed locally or obtained from a third party, is free of significant known security flaws.

(3) How to test and verify that software obtained from a third party correctly implements stated functionality, and only that functionality.

(4) How to guarantee the privacy of an individual's identity, information, or lawful transactions when stored in distributed systems or transmitted over networks.
(5) How to build new protocols to enable the Internet to have robust security as one of its key capabilities.

(6) How to determine the origin of a message transmitted over the Internet.

(7) How to support privacy in conjunction with improved security.

(8) How to address the growing problem of insider threat.

(b) Secure Coding Research.—The Director shall support research that evaluates selected secure coding education and improvement programs. The Director shall also support research on new methods of integrating secure coding improvement into the core curriculum of computer science programs and of other programs where graduates have a substantial probability of developing software after graduation.

(c) Assessment of Secure Coding Education in Colleges and Universities.—Within one year after the date of enactment of this Act, the Director shall submit to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science and Technology a report on the state of secure coding education in America’s colleges and universities for each school that received National Science
Foundation funding in excess of $1,000,000 during fiscal year 2008. The report shall include—

(1) the number of students who earned undergraduate degrees in computer science or in each other program where graduates have a substantial probability of being engaged in software design or development after graduation;

(2) the percentage of those students who completed substantive secure coding education or improvement programs during their undergraduate experience; and

(3) descriptions of the length and content of the education and improvement programs, and a measure of the effectiveness of those programs in enabling the students to master secure coding and design:

(d) CYBERSECURITY MODELING AND TESTBEDS.—

The Director shall establish a program to award grants to institutions of higher education to establish cybersecurity testbeds capable of realistic modeling of real-time cyber attacks and defenses. The purpose of this program is to support the rapid development of new cybersecurity defenses, techniques, and processes by improving understanding and assessing the latest technologies in a real-world environment. The testbeds shall be sufficiently large
in order to model the scale and complexity of real-world networks and environments.

(c) NSF Computer and Network Security Research Grant Areas.—Section 4(a)(1) of the Cybersecurity Research and Development Act (15 U.S.C. 7403(a)(1)) is amended—

(1) by striking "and" after the semicolon in subparagraph (H);

(2) by striking "property." in subparagraph (I) and inserting "property;"; and

(3) by adding at the end the following:

"(J) secure fundamental protocols that are at the heart of inter-network communications and data exchange;

"(K) secure software engineering and software assurance, including—

"(i) programming languages and systems that include fundamental security features;

"(ii) portable or reusable code that remains secure when deployed in various environments;

"(iii) verification and validation technologies to ensure that requirements and specifications have been implemented; and
(iv) models for comparison and metrics to assure that required standards have been met;

(L) holistic system security that—

(i) addresses the building of secure systems from trusted and untrusted components;

(ii) proactively reduces vulnerabilities;

(iii) addresses insider threats; and

(iv) supports privacy in conjunction with improved security;

(M) monitoring and detection; and

(N) mitigation and rapid recovery methods.”.

(f) NSF COMPUTER AND NETWORK SECURITY

GRANTS.—Section 4(a)(3) of the Cybersecurity Research and Development Act (15 U.S.C. 7403(a)(3)) is amended—

(1) by striking “and” in subparagraph (D);

(2) by striking “2007” in subparagraph (E) and inserting “2007;”; and

(3) by adding at the end of the following:

(E) $150,000,000 for fiscal year 2010;

(G) $155,000,000 for fiscal year 2011;

(H) $160,000,000 for fiscal year 2012;

(I) $165,000,000 for fiscal year 2013;

and

(J) $170,000,000 for fiscal year 2014.”.
(g) Computer and Network Security Centers.—Section 4(b)(7) of such Act (15 U.S.C. 7403(b)(7)) is amended—

(1) by striking “and” in subparagraph (D);

(2) by striking “2007” in subparagraph (E) and inserting “2007,”; and

(3) by adding at the end of the following:

“(F) $50,000,000 for fiscal year 2010;
“(G) $52,000,000 for fiscal year 2011;
“(H) $54,000,000 for fiscal year 2012;
“(I) $56,000,000 for fiscal year 2013; and
“(J) $58,000,000 for fiscal year 2014.”.

(h) Computer and Network Security Capacity Building Grants.—Section 5(a)(6) of such Act (15 U.S.C. 7404(a)(6)) is amended—

(1) by striking “and” in subparagraph (D);

(2) by striking “2007” in subparagraph (E) and inserting “2007,”; and

(3) by adding at the end of the following:

“(F) $40,000,000 for fiscal year 2010;
“(G) $42,000,000 for fiscal year 2011;
“(H) $44,000,000 for fiscal year 2012;
“(I) $46,000,000 for fiscal year 2013; and
“(J) $48,000,000 for fiscal year 2014.”.
(i) **Scientific and Advanced Technology Act Grants.**—Section 5(b)(2) of such Act (15 U.S.C. 7404(b)(2)) is amended—

(1) by striking “and” in subparagraph (D);

(2) by striking “2007” in subparagraph (E) and inserting “2007;”;

(3) by adding at the end of the following:

“(F) $5,000,000 for fiscal year 2010;

“(G) $6,000,000 for fiscal year 2011;

“(H) $7,000,000 for fiscal year 2012;

“(I) $8,000,000 for fiscal year 2013; and

“(J) $9,000,000 for fiscal year 2014.”.

(j) **Graduate Traineeships in Computer and Network Security Research.**—Section 5(c)(7) of such Act (15 U.S.C. 7404(c)(7)) is amended—

(1) by striking “and” in subparagraph (D);

(2) by striking “2007” in subparagraph (E) and inserting “2007;”;

(3) by adding at the end of the following:

“(F) $20,000,000 for fiscal year 2010;

“(G) $22,000,000 for fiscal year 2011;

“(H) $24,000,000 for fiscal year 2012;

“(I) $26,000,000 for fiscal year 2013; and

“(J) $28,000,000 for fiscal year 2014.”.
(k) Cybersecurity Faculty Development

Traineeship Program.—Section 5(e)(9) of such Act (15 U.S.C. 7404(e)(9)) is amended by striking "2007." and inserting "2007 and for each of fiscal years 2010 through 2014.".

(1) by striking "and" after the semicolon in subparagraph (B); and

(2) by inserting after subparagraph (C) the following:

"(D) develop and propose standards and guidelines, and develop measurement techniques and test methods, for enhanced cybersecurity for computer networks and common user interfaces to systems; and".

SEC. 12. FEDERAL CYBER SCHOLARSHIP-FOR-SERVICE PROGRAM.

(a) In general.—The Director of the National Science Foundation shall establish a Federal Cyber Scholarship-for-Service program to recruit and train the next generation of Federal information technology workers and security managers.
(b) Program Description and Components.—

The program—

(1) shall provide scholarships, that provide full tuition, fees, and a stipend, for up to 1,000 students per year in their pursuit of undergraduate or graduate degrees in the cybersecurity field;

(2) shall require scholarship recipients, as a condition of receiving a scholarship under the program, to agree to serve in the Federal information technology workforce for a period equal to the length of the scholarship following graduation if offered employment in that field by a Federal agency;

(3) shall provide opportunities for students to receive temporary appointments for meaningful employment in the Federal information technology workforce during school vacation periods and for internships;

(4) shall provide a procedure for identifying promising K–12 students for participation in summer work and internship programs that would lead to certification of Federal information technology workforce standards and possible future employment; and
(5) shall examine and develop, if appropriate, programs to promote computer security awareness in secondary and high school classrooms.

(e) Hiring Authority.—For purposes of any law or regulation governing the appointment of individuals in the Federal civil service, upon the successful completion of their studies, students receiving a scholarship under the program shall be hired under the authority provided for in section 213.3102(r) of title 5, Code of Federal Regulations, and be exempt from competitive service. Upon fulfillment of the service term, such individuals shall be converted to a competitive service position without competition if the individual meets the requirements for that position.

(d) Eligibility.—To be eligible to receive a scholarship under this section, an individual shall—

(1) be a citizen of the United States; and

(2) demonstrate a commitment to a career in improving the Nation’s cyber defenses.

(e) Consideration and Preference.—In making selections for scholarships under this section, the Director shall—

(1) consider, to the extent possible, a diverse pool of applicants whose interests are of an interdisciplinary nature, encompassing the social sei-
entific as well as the technical dimensions of cyber
security; and

(2) give preference to applicants that have par-
ticipated in the competition and challenge described
in section 19.

(f) EVALUATION AND REPORT.—The Director shall
evaluate and report to the Senate Committee on Com-
merce, Science, and Transportation and the House of Rep-
resentatives Committee on Science and Technology on the
success of recruiting individuals for the scholarships:

(g) AUTHORIZATION OF APPROPRIATIONS.—There
are authorized to be appropriated to the National Science
Foundation to carry out this section—

(1) $50,000,000 for fiscal year 2010;
(2) $55,000,000 for fiscal year 2011;
(3) $60,000,000 for fiscal year 2012;
(4) $65,000,000 for fiscal year 2013; and
(5) $70,000,000 for fiscal year 2014.

SEC. 13. CYBERSECURITY COMPETITION AND CHALLENGE.

(a) In General.—The Director of the National In-
stitute of Standards and Technology, directly or through
appropriate Federal entities, shall establish cybersecurity
competitions and challenges with cash prizes in order to—
(1) attract, identify, evaluate, and recruit talented individuals for the Federal information technology workforce; and

(2) stimulate innovation in basic and applied cybersecurity research, technology development, and prototype demonstration that have the potential for application to the Federal information technology activities of the Federal Government.

(b) TYPES OF COMPETITIONS AND CHALLENGES.—The Director shall establish different competitions and challenges targeting the following groups:

(1) High school students.

(2) Undergraduate students.

(3) Graduate students.

(4) Academic and research institutions.

(c) TOPICS.—In selecting topics for prize competitions, the Director shall consult widely both within and outside the Federal Government, and may empanel advisory committees.

(d) ADVERTISING.—The Director shall widely advertise prize competitions, in coordination with the awareness campaign under section 10, to encourage participation.

(e) REQUIREMENTS AND REGISTRATION.—For each prize competition, the Director shall publish a notice in the Federal Register announcing the subject of the com-
petition, the rules for being eligible to participate in the
competition, the amount of the prize, and the basis on
which a winner will be selected.

(f) ELIGIBILITY.—To be eligible to win a prize under
this section, an individual or entity—

(1) shall have registered to participate in the
competition pursuant to any rules promulgated by
the Director under subsection (d);

(2) shall have complied with all the require-
ments under this section;

(3) in the case of a private entity, shall be in-
corporated in and maintain a primary place of busi-
ness in the United States; and in the case of an in-
dividual, whether participating singly or in a group,
shall be a citizen or permanent resident of the
United States; and

(4) shall not be a Federal entity or Federal em-
ployee acting within the scope of his or her employ-
ment.

(g) JUDGES.—For each competition, the Director, ei-
ther directly or through an agreement under subsection
(h), shall assemble a panel of qualified judges to select
the winner or winners of the prize competition. Judges for
each competition shall include individuals from the private
sector. A judge may not—
(1) have personal or financial interests in, or be an employee, officer, director, or agent of any entity that is a registered participant in a competition; or

(2) have a familial or financial relationship with an individual who is a registered participant.

(h) ADMINISTERING THE COMPETITION.—The Director may enter into an agreement with a private, nonprofit entity to administer the prize competition, subject to the provisions of this section.

(i) FUNDING.—

(1) PRIZES.—Prizes under this section may consist of Federal appropriated funds and funds provided by the private sector for such cash prizes. The Director may accept funds from other Federal agencies for such cash prizes. The Director may not give special consideration to any private sector entity in return for a donation.

(2) USE OF UNEXPENDED FUNDS.—Notwithstanding any other provision of law, funds appropriated for prize awards under this section shall remain available until expended, and may be transferred, reprogrammed, or expended for other purposes only after the expiration of 10 fiscal years after the fiscal year for which the funds were originally appropriated. No provision in this section per-
mits obligation or payment of funds in violation of
the Anti-Deficiency Act (31 U.S.C. 1341).

(3) **Funding required before prize announced.**—No prize may be announced until all the
funds needed to pay out the announced amount of
the prize have been appropriated or committed in
writing by a private source. The Director may in-
crease the amount of a prize after an initial an-
nouncement is made under subsection (d) if—

(A) notice of the increase is provided in
the same manner as the initial notice of the
prize; and

(B) the funds needed to pay out the an-
nounced amount of the increase have been ap-
propriated or committed in writing by a private
source.

(4) **Notice required for large awards.**—
No prize competition under this section may offer a
prize in an amount greater than $5,000,000 unless
30 days have elapsed after written notice has been
transmitted to the Senate Committee on Commerce,
Science, and Transportation and the House of Rep-
resentatives Committee on Science and Technology.

(5) **Director's approval required for cer-
tain awards.**—No prize competition under this sec-
tion may result in the award of more than $1,000,000 in cash prizes without the approval of the Director.

(j) Use of Federal Insignia.—A registered participant in a competition under this section may use any Federal agency’s name, initials, or insignia only after prior review and written approval by the Director.

(k) Compliance With Existing Law.—The Federal Government shall not, by virtue of offering or providing a prize under this section, be responsible for compliance by registered participants in a prize competition with Federal law, including licensing, export control, and non-proliferation laws and related regulations.

(l) Authorization of Appropriations.—There are authorized to be appropriated to the National Institute of Standards and Technology to carry out this section $15,000,000 for each of fiscal years 2010 through 2014.

SEC. 14. PUBLIC–PRIVATE CLEARINGHOUSE.

(a) Designation.—The Department of Commerce shall serve as the clearinghouse of cybersecurity threat and vulnerability information to Federal Government and private sector owned critical infrastructure information systems and networks.

(b) Functions.—The Secretary of Commerce—
(1) shall have access to all relevant data concerning such networks without regard to any provision of law, regulation, rule, or policy restricting such access;

(2) shall manage the sharing of Federal Government and other critical infrastructure threat and vulnerability information between the Federal Government and the persons primarily responsible for the operation and maintenance of the networks concerned; and

(3) shall report regularly to the Congress on threat information held by the Federal Government that is not shared with the persons primarily responsible for the operation and maintenance of the networks concerned.

(e) INFORMATION SHARING RULES AND PROCEDURES.—Within 90 days after the date of enactment of this Act, the Secretary shall publish in the Federal Register a draft description of rules and procedures on how the Federal Government will share cybersecurity threat and vulnerability information with private sector critical infrastructure information systems and networks owners. After a 30 day comment period, the Secretary shall publish a final description of the rules and procedures. The description shall include—
(1) the rules and procedures on how the Federal Government will share cybersecurity threat and vulnerability information with private sector critical infrastructure information systems and networks owners;

(2) the criteria in which private sector owners of critical infrastructure information systems and networks shall share actionable cybersecurity threat and vulnerability information and relevant data with the Federal Government; and

(3) any other rule or procedure that will enhance the sharing of cybersecurity threat and vulnerability information between private sector owners of critical infrastructure information systems and networks and the Federal Government.

SEC. 15. CYBERSECURITY RISK MANAGEMENT REPORT.
Within 1 year after the date of enactment of this Act, the President, or the President's designee, shall report to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science and Technology on the feasibility of—

(1) creating a market for cybersecurity risk management, including the creation of a system of civil liability and insurance (including government reinsurance); and
(2) requiring cybersecurity to be a factor in all
bond ratings.

SEC. 16. LEGAL FRAMEWORK REVIEW AND REPORT.

(a) In General.—Within 1 year after the date of
enactment of this Act, the President, or the President’s
designee, through an appropriate entity, shall complete a
comprehensive review of the Federal statutory and legal
framework applicable to cyber-related activities in the
United States, including—

(1) the Privacy Protection Act of 1980 (42
U.S.C. 2000aa);

(2) the Electronic Communications Privacy Act
of 1986 (18 U.S.C. 2510 note);

(3) the Computer Security Act of 1987 (15
U.S.C. 271 et seq.; 40 U.S.C. 759);

(4) the Federal Information Security Manage-
ment Act of 2002 (44 U.S.C. 3531 et seq.);

(5) the E-Government Act of 2002 (44 U.S.C.
9501 et seq.);

(6) the Defense Production Act of 1950 (50
U.S.C. App. 2061 et seq.);

(7) any other Federal law bearing upon cyber-
related activities; and

(8) any applicable Executive Order or agency
rule, regulation, guideline.
(b) REPORT.—Upon completion of the review, the President, or the President’s designee, shall submit a report to the Senate Committee on Commerce, Science, and Transportation, the House of Representatives Committee on Science and Technology, and other appropriate Congressional Committees containing the President’s, or the President’s designee’s, findings, conclusions, and recommendations.

SEC. 17. AUTHENTICATION AND CIVIL LIBERTIES REPORT.

Within 1 year after the date of enactment of this Act, the President, or the President’s designee, shall review, and report to Congress, on the feasibility of an identity management and authentication program, with the appropriate civil liberties and privacy protections, for government and critical infrastructure information systems and networks.

SEC. 18. CYBERSECURITY RESPONSIBILITIES AND AUTHORITY.

The President—

(1) within 1 year after the date of enactment of this Act, shall develop and implement a comprehensive national cybersecurity strategy, which shall include—

(A) a long-term vision of the Nation’s cybersecurity future; and
(B) a plan that encompasses all aspects of national security, including the participation of the private sector, including critical infrastructure operators and managers;

(2) may declare a cybersecurity emergency and order the limitation or shutdown of Internet traffic to and from any compromised Federal Government or United States critical infrastructure information system or network;

(3) shall designate an agency to be responsible for coordinating the response and restoration of any Federal Government or United States critical infrastructure information system or network affected by a cybersecurity emergency declaration under paragraph (2);

(4) shall, through the appropriate department or agency, review equipment that would be needed after a cybersecurity attack and develop a strategy for the acquisition, storage, and periodic replacement of such equipment;

(5) shall direct the periodic mapping of Federal Government and United States critical infrastructure information systems or networks, and shall develop metrics to measure the effectiveness of the mapping process;
§ 773 RS

• (6) may order the disconnection of any Federal
  government or United States critical infrastructure
  information systems or networks in the interest of
  national security;

  (7) shall, through the Office of Science and
  Technology Policy, direct an annual review of all
  Federal cyber technology research and development
  investments;

  (8) may delegate original classification author-
  ity to the appropriate Federal official for the pur-
  poses of improving the Nation's cybersecurity pos-
  ture;

  (9) shall, through the appropriate department
  or agency, promulgate rules for Federal professional
  responsibilities regarding cybersecurity, and shall
  provide to the Congress an annual report on Federal
  agency compliance with those rules;

  (10) shall withhold additional compensation, di-
  rect corrective action for Federal personnel, or ter-
  minate a Federal contract in violation of Federal
  rules; and shall report any such action to the Con-
  gress in an unclassified format within 48 hours after
  taking any such action; and
(11) shall notify the Congress within 48 hours after providing a cyber-related certification of legality to a United States person.

**SEC. 19. QUADRENNIAL CYBER REVIEW.**

(a) In General.—Beginning with 2013 and in every fourth year thereafter, the President, or the President's designee, shall complete a review of the cyber posture of the United States, including an unclassified summary of roles, missions, accomplishments, plans, and programs. The review shall include a comprehensive examination of the cyber strategy, force structure, modernization plans, infrastructure, budget plan, the Nation's ability to recover from a cyberemergency, and other elements of the cyber program and policies with a view toward determining and expressing the cyber strategy of the United States and establishing a revised cyber program for the next 4 years.

(b) Involvement of Cybersecurity Advisory Panel.—

(1) The President, or the President's designee, shall apprise the Cybersecurity Advisory Panel established or designated under section 3, on an ongoing basis, of the work undertaken in the conduct of the review.

(2) Not later than 1 year before the completion date for the review, the Chairman of the Advisory
Panel shall submit to the President, or the President’s designee, the Panel’s assessment of work undertaken in the conduct of the review as of that date and shall include in the assessment the recommendations of the Panel for improvements to the review, including recommendations for additional matters to be covered in the review.

(e) Assessment of Review.—Upon completion of the review, the Chairman of the Advisory Panel, on behalf of the Panel, shall prepare and submit to the President, or the President’s designee, an assessment of the review in time for the inclusion of the assessment in its entirety in the report under subsection (d):

(d) Report.—Not later than September 30, 2013, and every 4 years thereafter, the President, or the President’s designee, shall submit to the relevant congressional Committees a comprehensive report on the review. The report shall include—

(1) the results of the review, including a comprehensive discussion of the cyber strategy of the United States and the collaboration between the public and private sectors best suited to implement that strategy;
(2) the threats examined for purposes of the review and the scenarios developed in the examination of such threats;

(3) the assumptions used in the review, including assumptions relating to the cooperation of other countries and levels of acceptable risk; and

(4) the Advisory Panel’s assessment.

SEC. 20. JOINT INTELLIGENCE THREAT ASSESSMENT.

The Director of National Intelligence and the Secretary of Commerce shall submit to the Congress an annual assessment of, and report on, cybersecurity threats to and vulnerabilities of critical national information, communication, and data network infrastructure.

SEC. 21. INTERNATIONAL NORMS AND CYBERSECURITY DETERRENCE MEASURES.

The President shall—

(1) work with representatives of foreign governments—

(A) to develop norms, organizations, and other cooperative activities for international engagement to improve cybersecurity; and

(B) to encourage international cooperation in improving cybersecurity on a global basis; and
(2) provide an annual report to the Congress on
the progress of international initiatives undertaken
pursuant to subparagraph (A).

SEC. 22. FEDERAL SECURE PRODUCTS AND SERVICES AC-
QUISITIONS BOARD.

(a) ESTABLISHMENT.—There is established a Secure
Products and Services Acquisitions Board. The Board
shall be responsible for cybersecurity review and approval
of high value products and services acquisition and, in co-
ordination with the National Institute of Standards and
Technology, for the establishment of appropriate stand-
ards for the validation of software to be acquired by the
Federal Government. The Director of the National Insti-
tute of Standards and Technology shall develop the review
process and provide guidance to the Board. In reviewing
software under this subsection, the Board may consider
independent secure software validation and verification as
key factor for approval.

(b) ACQUISITION STANDARDS.—The Director, in co-
operation with the Office of Management and Budget and
other appropriate Federal agencies, shall ensure that the
Board approval is included as a prerequisite to the acquisi-
tion of any product or service—

(1) subject to review by the Board; and

(2) subject to Federal acquisition standards.
(c) ACQUISITION COMPLIANCE.—After the publication of the standards developed under subsection (a), any proposal submitted in response to a request for proposals issued by a Federal agency shall demonstrate compliance with any such applicable standard in order to ensure that cybersecurity products and services are designed to be an integral part of the overall acquisition.

SEC. 23. DEFINITIONS.

In this Act:

(1) ADVISORY PANEL.—The term "Advisory Panel" means the Cybersecurity Advisory Panel established or designated under section 3.

(2) CYBER.—The term "cyber" means—

(A) any process, program, or protocol relating to the use of the Internet or an intranet, automatic data processing or transmission, or telecommunication via the Internet or an intranet; and

(B) any matter relating to, or involving the use of, computers or computer networks.

(3) FEDERAL GOVERNMENT AND UNITED STATES CRITICAL INFRASTRUCTURE INFORMATION SYSTEMS AND NETWORKS.—The term "Federal Government and United States critical infrastructure information systems and networks" includes—
(A) Federal Government information systems and networks; and

(B) State, local, and nongovernmental information systems and networks in the United States designated by the President as critical infrastructure information systems and networks.

(4) INTERNET.—The term “Internet” has the meaning given that term by section 4(4) of the High-Performance Computing Act of 1991 (15 U.S.C. 5503(4)).

(5) NETWORK.—The term “network” has the meaning given that term by section 4(5) of such Act (15 U.S.C. 5503(5)).

SECTION 1. SHORT TITLE; TABLE OF CONTENTS.

(a) SHORT TITLE.—This Act may be cited as the “Cybersecurity Act of 2010”.

(b) TABLE OF CONTENTS.—The table of contents for this Act is as follows:

Sec. 1. Short title; table of contents.
Sec. 2. Findings.
Sec. 3. Definitions.
Sec. 4. Procedure for designation of critical infrastructure information systems.

TITLE I—WORKFORCE DEVELOPMENT

Sec. 101. Certification and training of cybersecurity professionals.
Sec. 102. Federal Cyber Scholarship-for-Service Program.
Sec. 103. Cybersecurity competition and challenge.
Sec. 104. Cybersecurity workforce plan.
Sec. 105. Measures of cybersecurity hiring effectiveness.
TITLE II—PLANS AND AUTHORITY

Sec. 201. Cybersecurity responsibilities and authorities.
Sec. 203. Cybersecurity dashboard pilot project.
Sec. 204. NIST cybersecurity guidance.
Sec. 205. Legal framework review and report.
Sec. 206. Joint intelligence threat and vulnerability assessment.
Sec. 207. International norms and cybersecurity deterrence measures.
Sec. 208. Federal secure products and services acquisitions.
Sec. 209. Private sector access to classified information.
Sec. 211. Report on evaluation of certain identity authentication functionalities.

TITLE III—CYBERSECURITY KNOWLEDGE DEVELOPMENT

Sec. 301. Promoting cybersecurity awareness and education.
Sec. 302. Federal cybersecurity research and development.
Sec. 303. Development of curricula for incorporating cybersecurity into educational programs for future industrial control system designers.

TITLE IV—PUBLIC-PRIVATE COLLABORATION

Sec. 401. Cybersecurity Advisory Panel.
Sec. 402. State and regional cybersecurity enhancement program.
Sec. 403. Public–private clearinghouse.
Sec. 404. Cybersecurity risk management report.

SEC. 2. FINDINGS.

The Congress finds the following:

(1) As a fundamental principle, cyberspace is a vital asset for the nation and the United States should protect it using all instruments of national power, in order to ensure national security, public safety, economic prosperity, and the delivery of critical services to the American public.

(2) President Obama has rightfully determined that “our digital infrastructure—the networks and computers we depend on every day”—will be treated . . . as a strategic national asset”.

March 25, 2010 (12:53 p.m.)
According to the Obama Administration Cyberspace Policy Review, “the architecture of the Nation’s digital infrastructure is not secure or resilient. Without major advances in the security of these systems or significant change in how they are constructed or operated, it is doubtful that the United States can protect itself from the growing threat of cybercrime and state-sponsored intrusions and operations.”

With more than 85 percent of the Nation’s critical infrastructure owned and operated by the private sector, it is vital that the public and private sectors cooperate to protect this strategic national asset.

According to the 2010 Annual Threat Assessment, that “sensitive information is stolen daily from both government and private sector networks” and that “we cannot protect cyberspace without a coordinated and collaborative effort that incorporates both the US private sector and our international partners.”

The Director of National Intelligence testified before the Congress on February 2, 2010, that intrusions are a stark reminder of the importance of these cyber assets and should serve as “a wake-up call to those who have not taken this problem seriously.”
(7) The National Cybersecurity Coordinator, Howard Schmidt, stated on March 2, 2010, “we will not defeat our cyber adversaries because they are weakening, we will defeat them by becoming collectively stronger, through stronger technology, a stronger cadre of security professionals, and stronger partnerships.”.

(8) According to the National Journal, Mike McConnell, the former Director of National Intelligence, told President Bush in May 2007 that if the 9/11 attackers had chosen computers instead of airplanes as their weapons and had waged a massive assault on a United States bank, the economic consequences would have been “an order of magnitude greater” than those cased by the physical attack on the World Trade Center. Mike McConnell has subsequently referred to cybersecurity as the “soft underbelly of this country”.

(9) Paul Kurtz, a partner and chief operating officer of Good Harbor Consulting as well as a senior advisor to the Obama Transition Team for cybersecurity, has stated that the United States is unprepared to respond to a “cyber-Katrina” and that “a massive cyber disruption could have a cascading, long-term
impact without adequate co-ordination between government and the private sector”.

(10) According to the February 2003 National Strategy to Secure Cyberspace, “our nation’s critical infrastructures are composed of public and private institutions in the sectors of agriculture, food, water, public health, emergency services, government, defense industrial base, information and telecommunications, energy, transportation, banking finance, chemicals and hazardous materials, and postal and shipping. Cyberspace is their nervous system the control system of our country” and that “the cornerstone of America’s cyberspace security strategy is and will remain a public-private partnership”.

(11) The Center for Strategic and International Studies report on Cybersecurity for the 44th Presidency concluded that (A) cybersecurity is now a major national security problem for the United States, (B) decisions and actions must respect privacy and civil liberties, and (C) only a comprehensive national security strategy that embraces both the domestic and international aspects of cybersecurity will make us more secure. The report continued, stating that the United States faces “a long-term challenge in cyberspace from foreign intelligence agencies and
militaries, criminals, and others, and that losing this
struggle will wreak serious damage on the economic
health and national security of the United States”.

(12) James Lewis, Director and Senior Fellow,
Technology and Public Policy Program, Center for
Strategic and International Studies, testified on be-
half of the Center for Strategic and International
Studies that “the United States is not organized for,
and lacks a coherent national strategy for, addressing
cybersecurity”.

(13) The Cyber Strategic Inquiry 2008, spon-
sored by Business Executives for National Security
and executed by Booz Allen Hamilton, recommended
to “establish a single voice for cybersecurity within
government” concluding that the “unique nature of
cybersecurity requires a new leadership paradigm”.

(14) Alan Paller, the Director of Research at the
SANS Institute, testified before the Congress that
“Congress can reduce the threat of damage from these
new cyber attacks both against government and
against the critical infrastructure by shifting the gov-
ernment’s cyber security emphasis from report writ-
ing to automated, real-time defenses” and that “only
active White House leadership will get the job done”.

March 25, 2010 (12:53 p.m.)
(15) A 2009 Partnership for Public Service study and analysis reports concluded that “the Federal government will be unable to combat cyber threats without a more coordinated, sustained effort to increase cybersecurity expertise in the federal workforce” and that “the President’s success in combating these threats . . . must include building a vibrant, highly trained and dedicated cybersecurity workforce in this country”.

SEC. 3. DEFINITIONS.

In this Act:

(1) ADVISORY PANEL.—The term “Advisory Panel” means the Cybersecurity Advisory Panel established or designated under section 401.

(2) CYBERSECURITY.—The term “cybersecurity” means information security (as defined in section 3532(b)(1) of title 44, United States Code).

(3) CYBERSECURITY PROFESSIONAL.—The term “cybersecurity professional” means a person who maintains a certification under section 101 of this Act.

(4) INFORMATION SYSTEM.—The term “information system” has the meaning given that term by section 3532(b)(4) of title 44, United States Code, and
includes industrial control systems that are used for purposes described in that section.

(5) Internet.—The term “Internet” has the meaning given that term by section 4(4) of the High-Performance Computing Act of 1991 (15 U.S.C. 5503(4)).

(6) United States critical infrastructure information system.—The term “United States critical infrastructure information system” means an information system designated under section 4 of this Act.

SEC. 4. PROCEDURE FOR DESIGNATION OF CRITICAL INFRASTRUCTURE INFORMATION SYSTEMS.

(a) Establishment of Designation Procedure.—Within 90 days after the date of enactment of this Act, or as soon thereafter as may be practicable, the President, in consultation with sector coordinating councils, relevant government agencies, and regulatory entities, shall initiate a rulemaking in accordance with the requirements of chapter 5 of title 5, United States Code, to establish a procedure for the designation of any information system the infiltration, incapacitation, or disruption of which would have a debilitating impact on national security, including national economic security and national public health or safe-
ty, as a critical infrastructure information system under this Act.

(b) Threshold Requirements.—The final rule, at a minimum, shall—

(1) set forth objective criteria that meet the standard in section (a) for such designations generally;

(2) provide for emergency and temporary designations when necessary and in the public interest;

(3) ensure the protection of confidential and proprietary information associated with nongovernmental systems from disclosure;

(4) ensure the protection of classified and sensitive security information; and

(5) establish a procedure, in accordance with chapter 7 of title 5, United States Code, by which the owner or operator of an information system may appeal, or request modification of, the designation of that system or network as a critical infrastructure information system under this Act.

TITLE I—WORKFORCE DEVELOPMENT

SEC. 101. CERTIFICATION AND TRAINING OF CYBERSECURITY PROFESSIONALS.

(a) Study.—
(1) In general.—The President shall enter into an agreement with the National Academies to conduct a comprehensive study of government, academic, and private-sector accreditation, training, and certification programs for personnel working in cybersecurity. The agreement shall require that the National Academies consult with sector coordinating councils and relevant governmental agencies, regulatory entities, and nongovernmental organizations in the course of the study.

(2) Scope.—The study shall include—

(A) an evaluation of the body of knowledge and various skills that specific categories of personnel working in cybersecurity should possess in order to secure information systems;

(B) an assessment of whether existing government, academic, and private-sector accreditation, training, and certification programs provide the body of knowledge and skills described in subparagraph (A); and

(C) any other factors that should be considered for any accreditation, training, and certification programs.

(3) Report.—Not later than 1 year after the date of enactment of this Act, the National Academies
shall submit to the President and the Congress a report on the results of the study required by this subsection. The report shall include—

(A) findings regarding the state of cybersecurity accreditation, training, and certification programs, including specific areas of deficiency and demonstrable progress; and

(B) recommendations for the improvement of cybersecurity accreditation, training, and certification programs.

(b) Federal Information Systems.—Beginning no later than 6 months after receiving the report under subsection (a)(3), the President, in close and regular consultation with sector coordinating councils and relevant governmental agencies, regulatory entities, industry sectors, and nongovernmental organizations, shall—

(1) develop and annually review and update—

(A) guidance for the identification and categorization of positions for personnel conducting cybersecurity functions within the Federal government; and

(B) requirements for certification of personnel for categories identified under subparagraph (A); and
(2) annually evaluate compliance with the require-
ments in paragraph (1)(B).

(c) United States Critical Infrastructure In-
formation Systems.—

(1) Identification, categorization, and cer-
tification of positions.—Not later than 6 months
after receiving the report under section (a)(3), the
President, in close and regular consultation with sec-
tor coordinating councils and relevant governmental
agencies, regulatory entities, and nongovernmental or-
ganizations, shall require owners and operators of
United States critical infrastructure information sys-
tems to develop and annually review and update—

(A) guidance for the identification and cat-
egerization of positions for personnel conducting
cybersecurity functions within their respective
information systems; and

(B) requirements for certification of per-
sonnel for categories identified under subpara-
graph (A).

(2) Accreditation, training, and certification programs.—Not later than 6 months after
receiving the certification requirements submitted
under paragraph (1)(B), the President, in consulta-
tion with sector coordinating councils, relevant gov-
ernmental agencies, regulatory entities, and non-
governmental organizations, shall convene sector spe-
cific working groups to establish auditable private-
sector developed accreditation, training, and certifi-
cation programs for critical infrastructure informa-
tion system personnel working in cybersecurity.

(3) Positive Recognition.—Beginning no later
than 1 year after the President first convenes sector
specific working groups under paragraph (2), the
President shall—

(A) recognize and promote auditable pri-
ivate-sector developed accreditation, training, and
certification programs established in subsection
(b); and

(B) on an ongoing basis, but not less fre-
quently than annually, review and reconsider
recognitions under subparagraph (A) in order to
account for advances in accreditation, training,
and certification programs for personnel working
in cybersecurity.

(4) United States Critical Infrastructure
Information Systems Compliance.—

(A) In General.—Beginning no later than
1 year after the President first recognizes a pro-
gram under paragraph (3)(A), and on a semi-
annual basis thereafter, the President shall re-
quire each owner or operator of a United States
critical infrastructure information system to re-
port the results of independent audits that evalu-
ate compliance with the accreditation, training,
and certification programs recognized under
paragraph (3).

(B) POSITIVE RECOGNITION.—The Presi-
dent, in consultation with sector coordinating
councils, relevant governmental agencies, and
regulatory entities, and with the consent of indi-
vidual companies, may publicly recognize those
owners and operators of United States critical
infrastructure information systems whose inde-
pendent audits demonstrate compliance with the
accreditation, training, and certification pro-
gams recognized under paragraph (3).

(C) COLLABORATIVE REMEDIATION.—The
President shall require owners or operators of
United States critical infrastructure information
systems that fail to demonstrate substantial com-
pliance with the accreditation, training, and cer-
tification programs recognized under paragraph
(3) through 2 consecutive independent audits, in
consultation with sector coordinating councils,
relevant governmental agencies, and regulatory
tentities, to collaboratively develop and imple-
ment a remediation plan.

(d) Reference List for Consumers.—The President, in close and regular consultation with sector coordi-
nating councils and relevant governmental agencies, regu-
latory entities, and nongovernmental organizations, shall
annually—

(1) evaluate the cybersecurity accreditation,
training, and certification programs identified in this
section;

(2) identify those cybersecurity accreditation,
training, and certification programs whose rigor and
effectiveness are beneficial to cybersecurity; and

(3) publish a noncompulsory reference list of
those programs identified under paragraph (2).

SEC. 102. FEDERAL CYBER SCHOLARSHIP-FOR-SERVICE
PROGRAM.

(a) In General.—The Director of the National
Science Foundation shall establish a Federal Cyber Schol-
arship-for-Service program to recruit and train the next
generation of information technology professionals and se-
curity managers for Federal, State, local, and tribal govern-
ments.
(b) PROGRAM DESCRIPTION AND COMPONENTS.—The program shall—

(1) provide scholarships that provide full tuition, fees, and a stipend, for up to 1,000 students per year in their pursuit of undergraduate or graduate degrees in the cybersecurity field;

(2) require scholarship recipients, as a condition of receiving a scholarship under the program, to agree to serve in a Federal, State, local, or tribal information technology workforce for a period equal to the length of the scholarship following graduation if offered employment in that field by a Federal, State, local, or tribal agency;

(3) provide a procedure by which the Foundation or a Federal agency may, consistent with regulations of the Office of Personnel Management, request and fund security clearances for scholarship recipients;

(4) provide opportunities for students to receive temporary appointments for meaningful employment in the Federal information technology workforce during school vacation periods and for internships;

(5) provide a procedure for identifying promising K–12 students for participation in summer work and internship programs that would lead to cer-
tification of Federal information technology workforce standards and possible future employment; and

(6) examine and develop, if appropriate, programs to promote computer security awareness in secondary and high school classrooms.

c) HIRING AUTHORITY.—For purposes of any law or regulation governing the appointment of individuals in the Federal civil service, upon the successful completion of their studies, students receiving a scholarship under the program shall be hired under the authority provided for in section 213.3102(r) of title 5, Code of Federal Regulations, and be exempt from competitive service. Upon satisfactory fulfillment of the service term, such individuals may be converted to a competitive service position without competition if the individual meets the requirements for that position.

d) ELIGIBILITY.—To be eligible to receive a scholarship under this section, an individual shall—

(1) be a citizen of the United States;

(2) demonstrate a commitment to a career in improving the Nation’s cyber defenses; and

(3) have demonstrated a level of proficiency in math or computer sciences.

e) EVALUATION AND REPORT.—The Director shall evaluate and report periodically to the Congress on the success of recruiting individuals for the scholarships and on
hiring and retaining those individuals in the public sector workforce.

(f) Authorization of Appropriations.—There are authorized to be appropriated to the National Science Foundation to carry out this section—

(1) $50,000,000 for fiscal year 2010;
(2) $55,000,000 for fiscal year 2011;
(3) $60,000,000 for fiscal year 2012;
(4) $65,000,000 for fiscal year 2013; and
(5) $70,000,000 for fiscal year 2014.

SEC. 103. CYBERSECURITY COMPETITION AND CHALLENGE.

(a) In General.—The Director of the National Institute of Standards and Technology, directly or through appropriate Federal entities, shall establish cybersecurity competitions and challenges with cash prizes, and promulgate rules for participation in such competitions and challenges, in order to—

(1) attract, identify, evaluate, and recruit talented individuals for the Federal information technology workforce; and
(2) stimulate innovation in basic and applied cybersecurity research, technology development, and prototype demonstration that has the potential for application to the information technology activities of the Federal Government.
(b) Types of Competitions and Challenges.—The Director shall establish different competitions and challenges targeting the following groups:

(1) Middle school students.
(2) High school students.
(3) Undergraduate students.
(4) Graduate students.
(5) Academic and research institutions.

c) Topics.—In selecting topics for prize competitions, the Director shall consult widely both within and outside the Federal Government, and may empanel advisory committees.

d) Advertising.—The Director shall widely advertise prize competitions, in coordination with the awareness campaign under section 301, to encourage participation.

e) Requirements and Registration.—For each prize competition, the Director shall publish a notice in the Federal Register announcing the subject of the competition, the rules for being eligible to participate in the competition, the amount of the prize, and the basis on which a winner will be selected.

(f) Eligibility.—To be eligible to win a prize under this section, an individual or entity—
(1) shall have registered to participate in the competition pursuant to any rules promulgated by the Director under subsection (a);

(2) shall have complied with all the requirements under this section;

(3) in the case of a public or private entity, shall be incorporated in and maintain a primary place of business in the United States, and in the case of an individual, whether participating singly or in a group, shall be a citizen or permanent resident of the United States; and

(4) shall not be a Federal entity or Federal employee acting within the scope of his or her employment.

(g) JUDGES.—For each competition, the Director, either directly or through an agreement under subsection (h), shall assemble a panel of qualified judges to select the winner or winners of the prize competition. Judges for each competition shall include individuals from the private sector. A judge may not—

(1) have personal or financial interests in, or be an employee, officer, director, or agent of any entity that is a registered participant in a competition; or

(2) have a familial or financial relationship with an individual who is a registered participant.
(h) ADMINISTERING THE COMPETITION.—The Director may enter into an agreement with a private, nonprofit entity to administer the prize competition, subject to the provisions of this section.

(i) FUNDING.—

(1) PRIZES.—Prizes under this section may consist of Federal appropriated funds and funds provided by the private sector for such cash prizes. The Director may accept funds from other Federal agencies for such cash prizes. The Director may not give special consideration to any private sector entity in return for a donation.

(2) FUNDING REQUIRED BEFORE PRIZE ANNONCED.—No prize may be announced until all the funds needed to pay out the announced amount of the prize have been appropriated or committed in writing by a private source. The Director may increase the amount of a prize after an initial announcement is made under subsection (d) if—

(A) notice of the increase is provided in the same manner as the initial notice of the prize; and

(B) the funds needed to pay out the announced amount of the increase have been appro-
priated or committed in writing by a private
source.

(3) NOTICE REQUIRED FOR LARGE AWARDS.—No
prize competition under this section may offer a prize
in an amount greater than $5,000,000 unless 30 days
have elapsed after written notice has been transmitted
to the Senate Committee on Commerce, Science, and
Transportation and the House of Representatives
Committee on Science and Technology.

(4) DIRECTOR’S APPROVAL REQUIRED FOR CERTAIN AWARDS.—No prize competition under this sec-
tion may result in the award of more than $1,000,000
in cash prizes without the approval of the Director.

(j) USE OF FEDERAL INSIGNIA.—A registered partici-
pant in a competition under this section may use any Fed-
eral agency’s name, initials, or insignia only after prior
review and written approval by the Director.

(k) COMPLIANCE WITH EXISTING LAW.—The Federal
Government shall not, by virtue of offering or providing a
prize under this section, be responsible for compliance by
registered participants in a prize competition with Federal
law, including licensing, export control, and non-prolifera-
tion laws and related regulations.

(l) AUTHORIZATION OF APPROPRIATIONS.—There are
authorized to be appropriated to the National Institute of
Standards and Technology to carry out this section $15,000,000 for each of fiscal years 2010 through 2014.

SEC. 104. CYBERSECURITY WORKFORCE PLAN.

(a) Development of Plan.—Not later than 180 days after the date of enactment of this Act and in every subsequent year, the head of each Federal agency, based on guidance from the President, the Office of Personnel Management, the Chief Human Capital Officers Council, and the Chief Information Officers Council, shall develop a strategic cybersecurity workforce plan as part of the agency performance plan required under section 1115 of title 31, United States Code. The plan shall include—

(1) cybersecurity hiring projections, including occupation and grade level, over a 2-year period;

(2) long-term and short-term strategic planning to address critical skills deficiencies, including analysis of the numbers of and reasons for cybersecurity employee attrition;

(3) recruitment strategies, including the use of student internships, to attract highly qualified candidates from diverse backgrounds;

(4) an assessment of the sources and availability of talent with needed expertise;

(5) streamlining the hiring process;
(6) a specific analysis of the capacity of the agency workforce to manage contractors who are performing cybersecurity work on behalf of the Federal government;

(7) an analysis of the barriers to recruiting and hiring cybersecurity talent, including compensation, classification, hiring flexibilities, and the hiring process, and recommendations to overcome those barriers; and,

(8) a cybersecurity-related training and development plan to enhance or keep current the knowledge level of employees.

(b) HIRING PROJECTIONS.—Each Federal agency shall make hiring projections made under its strategic cybersecurity workforce plan available to the public, including on its website.

(c) CLASSIFICATION.—Based on the agency analyses and recommendations made under subsection (a)(7) of this section and other relevant information, the President or the President’s designee, in consultation with affected Federal agencies and councils, shall coordinate the establishment of new job classifications for cybersecurity functions in government and certification requirements for each job category.
SEC. 105. MEASURES OF CYBERSECURITY HIRING EFFECTIVENESS.

(a) IN GENERAL.—Each agency shall measure and collect information on cybersecurity hiring effectiveness with respect to the following:

(1) RECRUITING AND HIRING.—

(A) Ability to reach and recruit well-qualified talent from diverse talent pools.

(B) Use and impact of special hiring authorities and flexibilities to recruit most qualified applicants, including the use of student internship and scholarship programs as a talent pool for permanent hires.

(C) Use and impact of special hiring authorities and flexibilities to recruit diverse candidates, including veteran, minority, and disabled candidates.

(D) The age, educational level, and source of applicants.

(2) HIRING MANAGER ASSESSMENT.—

(A) Manager satisfaction with the quality of the applicants interviewed and new hires.

(B) Manager satisfaction with the match between the skills of newly hired individuals and the needs of the agency.
(C) Manager satisfaction with the hiring process and hiring outcomes.

(D) Mission-critical deficiencies closed by new hires and the connection between mission-critical deficiencies and annual agency performance.

(E) Manager satisfaction with the length of time to fill a position.

(3) APPLICANT ASSESSMENT.—Applicant satisfaction with the hiring process (including clarity of job announcement, reasons for withdrawal of application should that apply, user-friendliness of the application process, communication regarding status of application, and timeliness of job offer).

(4) NEW HIRE ASSESSMENT.—

(A) New hire satisfaction with the hiring process (including clarity of job announcement, user-friendliness of the application process, communication regarding status of application, and timeliness of hiring decision).

(B) Satisfaction with the onboarding experience (including timeliness of onboarding after the hiring decision, welcoming and orientation processes, and being provided with timely and
useful new employee information and assistance).

(C) New hire attrition, including by performance level and occupation.

(D) Investment in training and development for employees during their first year of employment.

(E) Exit interview results.

(F) Other indicators and measures as required by the Office of Personnel Management.

(b) REPORTS.—

(1) IN GENERAL.—Each agency shall submit the information collected under subsection (a) to the Office of Personnel Management annually in accordance with the regulations prescribed under subsection (c).

(2) AVAILABILITY OF RECRUITING AND HIRING INFORMATION.—Each year the Office of Personnel Management shall provide the information received under paragraph (1) in a consistent format to allow for a comparison of hiring effectiveness and experience across demographic groups and agencies to—

(A) the Congress before that information is made publicly available; and
(B) the public on the website of the Office within 90 days after receipt of the information under subsection (b)(1).

(c) REGULATIONS.—Not later than 180 days after the date of enactment of this Act, the Director of the Office of Personnel Management shall prescribe regulations establishing the methodology, timing, and reporting of the data described in subsection (a).

TITLE II—PLANS AND AUTHORITY

SEC. 201. CYBERSECURITY RESPONSIBILITIES AND AUTHORITY.

(a) IN GENERAL.—The President shall—

(1) within 180 days after the date of enactment of this Act, after notice and opportunity for public comment, develop and implement a comprehensive national cybersecurity strategy, which shall include—

(A) a long-term vision of the Nation’s cybersecurity future; and

(B) a plan that addresses all aspects of national security, as it relates to cybersecurity, including the proactive engagement of, and collaboration between, the Federal government and the private sector;
(2) in consultation with sector coordinating
councils and relevant governmental agencies, regu-
larly entities, and nongovernmental organizations,
review critical functions likely to be impacted by a
cyber attack and develop a strategy for the acquisi-
tion, storage, and periodic replacement of assets to
support those functions;

(3) through the Office of Science and Technology
Policy, direct an annual review of all Federal cyber
technology research and development investments; and

(4) through the Office of Personnel Management,
promulgate rules for Federal professional responsibil-
ities regarding cybersecurity, and provide to the Con-
gress an annual report on Federal agency compliance
with those rules.

(b) COLLABORATIVE EMERGENCY RESPONSE AND RES-
TORATION.—The President—

(1) shall, in collaboration with owners and oper-
ators of United States critical infrastructure informa-
tion systems, sector coordinating councils and rel-
evant governmental agencies, regulatory entities, and
nongovernmental organizations, develop and rehearse
detailed response and restoration plans that clarify
specific roles, responsibilities, and authorities of gov-
ernment and private sector actors during cybersecu-
rity emergencies, and that identify the types of events and incidents that would constitute a cybersecurity emergency;

(2) may, in the event of an immediate threat to strategic national interests involving compromised Federal Government or United States critical infrastructure information systems—

(A) declare a cybersecurity emergency; and

(B) implement the collaborative emergency response and restoration plans developed under paragraph (1);

(3) shall, in the event of a declaration of a cybersecurity emergency—

(A) within 48 hours submit to Congress a report in writing setting forth—

(i) the circumstances necessitating the emergency declaration; and

(ii) the estimated scope and duration of the emergency; and

(B) so long as the cybersecurity emergency declaration remains in effect, report to the Congress periodically, but in no event less frequently than once every 30 days, on the status of emergency as well as on the scope and duration of the emergency.
(c) Rule of Construction.—This section does not authorize, and shall not be construed to authorize, an expansion of existing Presidential authorities.

SEC. 202. BIENNIAL CYBER REVIEW.

(a) In General.—Beginning with 2010 and in every second year thereafter, the President, or the President’s designee, shall complete a review of the cyber posture of the United States, including an unclassified summary of roles, missions, accomplishments, plans, and programs. The review shall include a comprehensive examination of the cyber strategy, force structure, personnel, modernization plans, infrastructure, budget plan, the Nation’s ability to recover from a cyber emergency, and other elements of the cyber program and policies with a view toward determining and expressing the cyber strategy of the United States and establishing a revised cyber program for the next 2 years.

(b) Involvement of Cybersecurity Advisory Panel.—

(1) The President, or the President’s designee, shall apprise the Cybersecurity Advisory Panel established or designated under section 401, on an ongoing basis, of the work undertaken in the conduct of the review.

(2) Not later than 1 year before the completion date for the review, the Chairman of the Advisory
Panel shall submit to the President, or the President’s
designee, the Panel’s assessment of work undertaken
in the conduct of the review as of that date and shall
include in the assessment the recommendations of the
Panel for improvements to the review, including rec-
ommendations for additional matters to be covered in
the review.

(c) ASSESSMENT OF REVIEW.—Upon completion of the
review, the Chairman of the Advisory Panel, on behalf of
the Panel, shall prepare and submit to the President, or
the President’s designee, an assessment of the review in time
for the inclusion of the assessment in its entirety in the
report under subsection (d).

(d) REPORT.—Not later than September 30, 2010, and
every 2 years thereafter, the President, or the President’s
designee, shall submit to the relevant congressional Commit-
tees a comprehensive report on the review. The report shall
include—

(1) the results of the review, including a com-
prehensive discussion of the cyber strategy of the
United States and the collaboration between the pub-
lic and private sectors best suited to implement that
strategy;
(2) the threats examined for purposes of the re-
view and the scenarios developed in the examination
of such threats;

(3) the assumptions used in the review, includ-
ing assumptions relating to the cooperation of other
countries and levels of acceptable risk; and

(4) the Advisory Panel’s assessment.

SEC. 203. CYBERSECURITY DASHBOARD PILOT PROJECT.

The Secretary of Commerce shall—

(1) in consultation with the Office of Manage-
ment and Budget, develop a plan within 90 days
after the date of enactment of this Act to implement
a system to provide dynamic, comprehensive, real-
time cybersecurity status and vulnerability informa-
tion of all Federal Government information systems
managed by the Department of Commerce, including
an inventory of such, vulnerabilities of such systems,
and corrective action plans for those vulnerabilities;

(2) implement the plan within 1 year after the
date of enactment of this Act; and

(3) submit a report to the Congress on the imple-
mentation of the plan.

SEC. 204. NIST CYBERSECURITY GUIDANCE.

(a) In General.—Beginning no later than 1 year
after the date of enactment of this Act, the National Insti-
tute of Standards and Technology, in close and regular consultation with sector coordinating councils and relevant governmental agencies, regulatory entities, and nongovernmental organizations, shall—

(1) recognize and promote auditable, private sector developed cybersecurity risk measurement techniques, risk management measures and best practices for all Federal Government and United States critical infrastructure information systems; and

(2) on an ongoing basis, but not less frequently than semi-annually, review and reconsider its recognitions under paragraph (1) in order to account for advances in cybersecurity risk measurement techniques, risk management measures, and best practices.

(b) Federal Information Systems.—Within 1 year after the National Institute of Standards and Technology issues guidance under subsection (a)(1), the President shall require all Federal departments and agencies to measure their risk in each operating unit using the techniques recognized under subsection (a) and to comply with or exceed the cybersecurity risk management measures and best practices recognized under subsection (a).

(c) United States Critical Infrastructure Information Systems.—
(1) **IN GENERAL.**—On the earlier of the date on which the final rule in the rulemaking required by section 4 is promulgated, or 1 year after the President first recognizes the cybersecurity risk measurement techniques, risk management measures and best practices under subsection (a), and on a semi-annual basis thereafter, the President shall require each owner or operator of a United States critical infrastructure information system to report the results of independent audits that evaluate compliance with cybersecurity risk measurement techniques, risk management measures, and best practices recognized under subsection (a).

(2) **POSITIVE RECOGNITION.**—The President, in consultation with sector coordinating councils, relevant governmental agencies, and regulatory entities, and with the consent of individual companies, may publicly recognize those owners and operators of United States critical infrastructure information systems whose independent audits demonstrate compliance with cybersecurity risk measurement techniques, risk management measures, and best practices recognized under subsection (a);

(3) **COLLABORATIVE REMEDIATION.**—The President shall require owners or operators of United
States critical infrastructure information systems that fail to demonstrate substantial compliance with cybersecurity risk measurement techniques, risk management measures, and best practices recognized under subsection (a) through 2 consecutive independent audits, in consultation with sector coordinating councils, relevant governmental agencies, and regulatory entities, to collaboratively develop and implement a remediation plan.

(d) **INTERNATIONAL STANDARDS DEVELOPMENT.**—

Within 1 year after the date of enactment of this Act, the Director, in coordination with the Department of State and other relevant governmental agencies and regulatory entities, and in consultation with sector coordinating councils and relevant nongovernmental organizations, shall—

(1) direct United States cybersecurity efforts before all international standards development bodies related to cybersecurity;

(2) develop and implement a strategy to engage international standards bodies with respect to the development of technical standards related to cybersecurity; and

(3) submit the strategy to the Congress.

(e) **CRITERIA FOR FEDERAL INFORMATION SYSTEMS.**—Notwithstanding any other provision of law (in-
excluding any Executive Order), rule, regulation, or guideline pertaining to the distinction between national security systems and civilian agency systems, the Institute shall adopt a risk-based approach in the development of Federal cybersecurity guidance for Federal information systems.

(f) **FCC Broadband Cybersecurity Review.**—Within 1 year after the date of enactment of this Act, the Federal Communications Commission shall report to Congress on effective and efficient means to ensure the cybersecurity of commercial broadband networks as related to public safety, consumer welfare, healthcare, education, energy, government, security and other national purposes. This report should also consider consumer education and outreach programs to assist individuals in protecting their home and personal computers and other devices.

(g) **Elimination of Duplicative Requirements.**—The President shall direct the National Institute of Standards and Technology and other appropriate Federal agencies to identify private sector entities already required to report their compliance with cybersecurity laws, directives, and regulations to streamline compliance with duplicative reporting requirements.

**SEC. 205. LEGAL FRAMEWORK REVIEW AND REPORT.**

(a) **In General.**—Within 1 year after the date of enactment of this Act, the Comptroller General shall complete
a comprehensive review of the Federal statutory and legal
framework applicable to cybersecurity-related activities in
the United States, including—

(1) the Privacy Protection Act of 1980 (42
U.S.C. 2000aa);

(2) the Electronic Communications Privacy Act
of 1986 (18 U.S.C. 2510 note);

(3) the Computer Security Act of 1987 (15
U.S.C. 271 et seq.; 40 U.S.C. 759);

(4) the Federal Information Security Manage-
ment Act of 2002 (44 U.S.C. 3531 et seq.);

(5) the E-Government Act of 2002 (44 U.S.C.
9501 et seq.);

(6) the Defense Production Act of 1950 (50
U.S.C. App. 2061 et seq.);

(7) section 552 of title 5, United States Code;

(8) the Federal Advisory Committee Act (5
U.S.C. App.);

(9) any other Federal law bearing upon cyberse-
curity-related activities; and

(10) any applicable Executive Order or agency
rule, regulation, or guideline.

(b) REPORT.—Upon completion of the review the
Comptroller General shall submit a report to the Congress
containing the Comptroller General’s, findings, conclusions,
and recommendations regarding changes needed to advance cybersecurity and protect civil liberties in light of new cybersecurity measures.

SEC. 206. JOINT INTELLIGENCE THREAT AND VULNERABILITY ASSESSMENT.

The Director of National Intelligence, the Secretary of Commerce, the Secretary of Homeland Security, the Attorney General, the Secretary of Defense, and the Secretary of State shall submit to the Congress a joint assessment of, and report on, cybersecurity threats to and vulnerabilities of Federal information systems and United States critical infrastructure information systems.

SEC. 207. INTERNATIONAL NORMS AND CYBERSECURITY DETERRANCE MEASURES.

The President shall—

(1) work with representatives of foreign governments, private sector entities, and nongovernmental organizations—

(A) to develop norms, organizations, and other cooperative activities for international engagement to improve cybersecurity; and

(B) to encourage international cooperation in improving cybersecurity on a global basis; and
(2) provide an annual report to the Congress on
the progress of international initiatives undertaken
pursuant to subparagraph (A).

SEC. 208. FEDERAL SECURE PRODUCTS AND SERVICES AC-
QUISITIONS.

(a) Acquisition Requirements.—The Adminis-
trator of the General Services Administration, in coopera-
tion with the Office of Management and Budget and other
appropriate Federal agencies, shall require that requests for
information and requests for proposals for Federal informa-
tion systems products and services include cybersecurity
risk measurement techniques, risk management measures,
and best practices recognized under section 204 and the cy-
bersecurity professional certifications recognized under sec-
tion 101 of this Act.

(b) Acquisition Compliance.—After the publication
of the requirements established by the Administrator under
subsection (a), a Federal agency may not issue a request
for proposals for Federal information systems products and
services that does not comply with the requirements.

SEC. 209. PRIVATE SECTOR ACCESS TO CLASSIFIED INFOR-
MATION.

(a) Evaluation.—The President shall conduct an an-
nual evaluation of the sufficiency of present access to classified information among owners and operators of United
States critical infrastructure information systems and submit a report to the Congress on the evaluation.

(b) Security Clearances.—To the extent determined by the President to be necessary to enhance public-private information sharing and cybersecurity collaboration, the President may—

(1) grant additional security clearances to owners and operators of United States critical infrastructure information systems; and

(2) delegate original classification authority to appropriate Federal officials on matters related to cybersecurity.

SEC. 210. AUTHENTICATION AND CIVIL LIBERTIES REPORT.

Within 1 year after the date of enactment of this Act, the President, or the President’s designee, in consultation with sector coordinating councils, relevant governmental agencies, regulatory entities, and nongovernmental organizations, shall review, and report to Congress, on the feasibility of an identity management and authentication program, with the appropriate civil liberties and privacy protections, for Federal government and United States critical infrastructure information systems.
SEC. 211. REPORT ON EVALUATION OF CERTAIN IDENTITY AUTHENTICATION FUNCTIONALITIES.

(a) In General.—Not later than 90 days after the date of enactment of this Act, the National Institute of Standards and Technology shall issue a public report evaluating identity authentication solutions to determine the necessary level of functionality and privacy protection, based on risk, commensurate with the level of data assurance and sensitivity, as defined by OMB e-Authentication Guidance Memorandum 04-04 (OMB 04-04).

(b) Contents.—The report shall—

(1) assess strategies and best practices for mapping the 4 authentication levels with authentication functionalities appropriate for each level; and

(2) address specifically authentication levels and appropriate functionalities necessary and available for the protection of electronic medical records and health information.

TITLE III—CYBERSECURITY KNOWLEDGE DEVELOPMENT

SEC. 301. PROMOTING CYBERSECURITY AWARENESS AND EDUCATION.

(a) In General.—The Secretary of Commerce, in consultation with sector coordinating councils, relevant governmental agencies, regulatory entities, and nongovernmental
organizations, shall develop and implement a national cybersecurity awareness campaign that—

(1) calls a new generation of Americans to service in the field of cybersecurity;

(2) heightens public awareness of cybersecurity issues and concerns;

(3) communicates the Federal Government’s role in securing the Internet and protecting privacy and civil liberties with respect to Internet-related activities; and

(4) utilizes public and private sector means of providing information to the public, including public service announcements.

(b) EDUCATIONAL PROGRAMS.—The Secretary of Education, in consultation with State school superintendents, relevant Federal agencies, industry sectors, and nongovernmental organizations, shall identify and promote age appropriate information and programs for grades K-12 regarding cyber safety, cybersecurity, and cyber ethics.

SEC. 302. FEDERAL CYBERSECURITY RESEARCH AND DEVELOPMENT.

(a) FUNDAMENTAL CYBERSECURITY RESEARCH.—The Director of the National Science Foundation, in coordination with the Office of Science and Technology Policy, and drawing on the recommendations of the Office of Science
and Technology Policy’s annual review of all Federal cyber technology research and development investments required by section 201(a)(3), shall develop a national cybersecurity research and development plan. The plan shall encourage computer and information science and engineering research to meet the following challenges in cybersecurity:

(1) How to design and build complex software-intensive systems that are secure and reliable when first deployed.

(2) How to test and verify that software, whether developed locally or obtained from a third party, is free of significant known security flaws.

(3) How to test and verify that software obtained from a third party correctly implements stated functionality, and only that functionality.

(4) How to guarantee the privacy of an individual’s identity, information, or lawful transactions when stored in distributed systems or transmitted over networks.

(5) How to build new protocols to enable the Internet to have robust security as one of its key capabilities.

(6) How to determine the origin of a message transmitted over the Internet.
(7) How to support privacy in conjunction with improved security.

(8) How to address the growing problem of insider threat.

(9) How improved consumer education and digital literacy initiatives can address human factors that contribute to cybersecurity.

(b) Secure Coding Research.—The Director shall support research that evaluates selected secure coding education and improvement programs. The Director shall also support research on new methods of integrating secure coding improvement into the core curriculum of computer science programs and of other programs where graduates have a substantial probability of developing software after graduation.

(c) Assessment of Secure Coding Education in Colleges and Universities.—Within 1 year after the date of enactment of this Act, the Director shall submit to the Senate Committee on Commerce, Science, and Transportation and the House of Representatives Committee on Science and Technology a report on the state of secure coding education in America’s colleges and universities for each school that received National Science Foundation funding in excess of $1,000,000 during fiscal year 2008. The report shall include—
(1) the number of students who earned undergraduate degrees in computer science or in each other program where graduates have a substantial probability of being engaged in software design or development after graduation;

(2) the percentage of those students who completed substantive secure coding education or improvement programs during their undergraduate experience; and

(3) descriptions of the length and content of the education and improvement programs and an evaluation of the effectiveness of those programs based on the students’ scores on standard tests of secure coding and design skills.

(d) Cybersecurity Modeling and Testbeds.—Within 1 year after the date of enactment of this Act, the Director shall conduct a review of existing cybersecurity testbeds. Based on the results of that review, the Director shall establish a program to award grants to institutions of higher education to establish cybersecurity testbeds capable of realistic modeling of real-time cyber attacks and defenses. The purpose of this program is to support the rapid development of new cybersecurity defenses, techniques, and processes by improving understanding and assessing the latest technologies in a real-world environment. The testbeds
shall be sufficiently large in order to model the scale and complexity of real world networks and environments.

(e) NSF COMPUTER AND NETWORK SECURITY RESEARCH GRANT AREAS.—Section 4(a)(1) of the Cybersecurity Research and Development Act (15 U.S.C. 7403(a)(1)) is amended—

(1) by striking “and” after the semicolon in subparagraph (H);

(2) by striking “property.” in subparagraph (I) and inserting “property;”; and

(3) by adding at the end the following:

“(J) secure fundamental protocols that are at the heart of inter-network communications and data exchange;

“(K) secure software engineering and software assurance, including—

“(i) programming languages and systems that include fundamental security features;

“(ii) portable or reusable code that remains secure when deployed in various environments;

“(iii) verification and validation technologies to ensure that requirements and specifications have been implemented; and

“(iv) models for comparison and metrics to assure that required standards have been met;
“(L) holistic system security that—

“(i) addresses the building of secure systems from trusted and untrusted components;

“(ii) proactively reduces vulnerabilities;

“(iii) addresses insider threats; and

“(iv) supports privacy in conjunction with improved security;

“(M) monitoring and detection; and

“(N) mitigation and rapid recovery methods.”.

(1) by striking “and” in subparagraph (D);

(2) by striking “2007.” in subparagraph (E) and inserting “2007;”;

and

(3) by adding at the end of the following:

“(F) $150,000,000 for fiscal year 2010;

“(G) $155,000,000 for fiscal year 2011;

“(H) $160,000,000 for fiscal year 2012;

“(I) $165,000,000 for fiscal year 2013; and

“(J) $170,000,000 for fiscal year 2014.”.

(g) Computer and Network Security Centers.—

Section 4(b)(7) of such Act (15 U.S.C. 7403(b)(7)) is amended—

(1) by striking “and” in subparagraph (D);
(2) by striking “2007.” in subparagraph (E) and inserting “2007;”; and

(3) by adding at the end of the following:

“(F) $50,000,000 for fiscal year 2010;
“(G) $52,000,000 for fiscal year 2011;
“(H) $54,000,000 for fiscal year 2012;
“(I) $56,000,000 for fiscal year 2013; and
“(J) $58,000,000 for fiscal year 2014.”.

(h) COMPUTER AND NETWORK SECURITY CAPACITY BUILDING GRANTS.—Section 5(a)(6) of such Act (15 U.S.C.
7404(a)(6)) is amended—

(1) by striking “and” in subparagraph (D);

(2) by striking “2007.” in subparagraph (E) and inserting “2007;”; and

(3) by adding at the end of the following:

“(F) $40,000,000 for fiscal year 2010;
“(G) $42,000,000 for fiscal year 2011;
“(H) $44,000,000 for fiscal year 2012;
“(I) $46,000,000 for fiscal year 2013; and
“(J) $48,000,000 for fiscal year 2014.”.

(i) SCIENTIFIC AND ADVANCED TECHNOLOGY ACT GRANTS.—Section 5(b)(2) of such Act (15 U.S.C.
7404(b)(2)) is amended—

(1) by striking “and” in subparagraph (D);
(2) by striking “2007.” in subparagraph (E) and inserting “2007;”; and

(3) by adding at the end of the following:

“(F) $5,000,000 for fiscal year 2010;
“(G) $6,000,000 for fiscal year 2011;
“(H) $7,000,000 for fiscal year 2012;
“(I) $8,000,000 for fiscal year 2013; and
“(J) $9,000,000 for fiscal year 2014.”.

(j) Graduate Traineeships in Computer and Network Security Research.—Section 5(c)(7) of such Act (15 U.S.C. 7404(c)(7)) is amended—

(1) by striking “and” in subparagraph (D);

(2) by striking “2007.” in subparagraph (E) and inserting “2007;”; and

(3) by adding at the end of the following:

“(F) $20,000,000 for fiscal year 2010;
“(G) $22,000,000 for fiscal year 2011;
“(H) $24,000,000 for fiscal year 2012;
“(I) $26,000,000 for fiscal year 2013; and
“(J) $28,000,000 for fiscal year 2014.”.

(k) Cybersecurity Faculty Development Traineeship Program.—Section 5(e)(9) of such Act (15 U.S.C. 7404(e)(9)) is amended by striking “2007.” and inserting “2007 and for each of fiscal years 2010 through 2014.”.

(1) by striking “and” after the semicolon in sub-
paragraph (B); and

(2) by inserting after subparagraph (C) the fol-
lowing:

“(D) develop and propose standards and
guidelines, and develop measurement techniques
and test methods, for enhanced cybersecurity for
computer networks and common user interfaces
to systems; and”.

SEC. 303. DEVELOPMENT OF CURRICULA FOR INCOR-
PORATING CYBERSECURITY INTO EDU-
CATIONAL PROGRAMS FOR FUTURE INDU-
STRIAL CONTROL SYSTEM DESIGNERS.

(a) IN GENERAL.—The Director of the National
Science Foundation shall establish a grant program to fund
public and private educational institutions to develop grad-
uate and undergraduate level curricula that address cyber-
security in modern industrial control systems. In admin-
istering the program, the Director—

(1) shall establish such requirements for the sub-
mission of applications containing such information,
commitments, and assurances as the Director finds necessary and appropriate;

(2) shall award the grants on a competitive basis;

(3) shall require grant recipients to make the developed curricula and related materials to other public and private educational institutions; and

(4) may make up to 3 grants per year.

(b) AUTHORIZATION OF APPROPRIATIONS.—There are authorized to be appropriated to the Director to carry out the grant program under this section $2,000,000 for each of fiscal years 2011 and 2012.

TITLE IV—PUBLIC-PRIVATE COLLABORATION

SEC. 401. CYBERSECURITY ADVISORY PANEL.

(a) IN GENERAL.—The President shall establish or designate a Cybersecurity Advisory Panel.

(b) QUALIFICATIONS.—The President—

(1) shall appoint as members of the panel representatives of industry, academic, non-profit organizations, interest groups and advocacy organizations, and State and local governments who are qualified to provide advice and information on cybersecurity re-
sonnel, technology transfer, commercial application, or societal and civil liberty concerns; and

(2) may seek and give consideration to recommendations from the Congress, industry, the cyber-security community, the defense community, State and local governments, and other appropriate organizations.

(c) DUTIES.—The panel shall advise the President on matters relating to the national cybersecurity program and strategy and shall assess—

(1) trends and developments in cybersecurity science research and development;

(2) progress made in implementing the strategy;

(3) the need to revise the strategy;

(4) the readiness and capacity of the Federal and national workforces to implement the national cybersecurity program and strategy, and the steps necessary to improve workforce readiness and capacity;

(5) the balance among the components of the national strategy, including funding for program components;

(6) whether the strategy, priorities, and goals are helping to maintain United States leadership and defense in cybersecurity;
(7) the management, coordination, implementation, and activities of the strategy;

(8) whether the concerns of Federal, State, and local law enforcement entities are adequately addressed; and

(9) whether societal and civil liberty concerns are adequately addressed.

(d) REPORTS.—The panel shall report, not less frequently than once every 2 years, to the President on its assessments under subsection (c) and its recommendations for ways to improve the strategy.

(e) Travel Expenses of Non-Federal Members.—Non-Federal members of the panel, while attending meetings of the panel or while otherwise serving at the request of the head of the panel while away from their homes or regular places of business, may be allowed travel expenses, including per diem in lieu of subsistence, as authorized by section 5703 of title 5, United States Code, for individuals in the government serving without pay. Nothing in this subsection shall be construed to prohibit members of the panel who are officers or employees of the United States from being allowed travel expenses, including per diem in lieu of subsistence, in accordance with law.
(f) Exemption from FACA Sunset.—Section 14 of the Federal Advisory Committee Act (5 U.S.C. App.) shall not apply to the Advisory Panel.

SEC. 402. STATE AND REGIONAL CYBERSECURITY ENHANCEMENT PROGRAM.

(a) Creation and Support of Cybersecurity Centers.—The Secretary of Commerce shall provide assistance for the creation and support of Regional Cybersecurity Centers for the promotion of private sector developed cybersecurity risk measurement techniques, risk management measures, and best practices. Each Center shall be affiliated with a United States-based nonprofit institution or organization, or consortium thereof, that applies for and is awarded financial assistance under this section.

(b) Purpose.—The purpose of the Centers is to enhance the cybersecurity of small and medium-sized businesses in the United States through—

(1) the promotion of private sector developed cybersecurity risk measurement techniques, risk management measures, and best practices to small- and medium-sized companies throughout the United States;

(2) the voluntary participation of individuals from industry, universities, State governments, other Federal agencies, and, when appropriate, the Institute
in cooperative technology transfer activities in accordance with existing technology transfer rules and intellectual property protection measures;

(3) efforts to make new cybersecurity technology, standards, and processes usable by United States-based small- and medium-sized companies;

(4) the active dissemination of scientific, engineering, technical, and management information about cybersecurity to industrial firms, including small- and medium-sized companies;

(5) the utilization, when appropriate, of the expertise and capability that exists in Federal laboratories other than the Institute; and

(6) the performance of these and related activities in a manner that supplements or coordinates with, and does not compete with or duplicate, private sector activities.

(c) ACTIVITIES.—The Centers shall—

(1) disseminate cybersecurity technologies, standards, and processes based on research by the Institute for the purpose of demonstrations and technology transfer;

(2) actively transfer and disseminate private sector developed cybersecurity risk measurement techniques, risk management measures, and best practices
to protect against and mitigate the risk of cyber attacks to a wide range of companies and enterprises, particularly small- and medium-sized businesses; and

(3) make loans, on a selective, short-term basis, of items of advanced protective cybersecurity measures to small businesses with less than 100 employees.

(c) DURATION AND AMOUNT OF SUPPORT; PROGRAM DESCRIPTIONS; APPLICATIONS; MERIT REVIEW; EVALUATIONS OF ASSISTANCE.—

(1) FINANCIAL SUPPORT.—The Secretary may provide financial support, not to exceed 50 percent of the Center’s annual operating and maintenance costs, to any Center for a period not to exceed 6 years (except as provided in paragraph (5)(D)).

(2) PROGRAM DESCRIPTION.—Within 90 days after the date of enactment of this Act, the Secretary shall publish in the Federal Register a draft description of a program for establishing Centers and, after a 30-day comment period, shall publish a final description of the program. The description shall include—

(A) a description of the program;

(B) procedures to be followed by applicants;

(C) criteria for determining qualified applicants;
(D) criteria, including those described in paragraph (4), for choosing recipients of financial assistance under this section from among the qualified applicants; and

(E) maximum support levels expected to be available to Centers under the program in the fourth through sixth years of assistance under this section.

(3) APPLICATIONS; SUPPORT COMMITMENT.—

Any nonprofit institution, or consortia of nonprofit institutions, may submit to the Secretary an application for financial support under this section, in accordance with the procedures established by the Secretary. In order to receive assistance under this section, an applicant shall provide adequate assurances that it will contribute 50 percent or more of the proposed Center’s annual operating and maintenance costs for the first 3 years and an increasing share for each of the next 3 years.

(4) AWARD CRITERIA.—Awards shall be made on a competitive, merit-based review. In making a decision whether to approve an application and provide financial support under this section, the Secretary shall consider, at a minimum—
(A) the merits of the application, particularly those portions of the application regarding technology transfer, training and education, and adaptation of cybersecurity technologies to the needs of particular industrial sectors;

(B) the quality of service to be provided;

(C) geographical diversity and extent of service area; and

(D) the percentage of funding and amount of in-kind commitment from other sources.

(5) THIRD YEAR EVALUATION.—

(A) IN GENERAL.—Each Center which receives financial assistance under this section shall be evaluated during its third year of operation by an evaluation panel appointed by the Secretary.

(B) EVALUATION PANEL.—Each evaluation panel shall be composed of private experts and Federal officials, none of whom shall be connected with the involved Center. Each evaluation panel shall measure the Center’s performance against the objectives specified in this section and ensure that the Center is not competing with, or duplicating, private sector activities.
(C) **Positive Evaluation Required for Continued Funding.**—The Secretary may not provide funding for the fourth through the sixth years of a Center’s operation unless the evaluation by the evaluation panel is positive. If the evaluation is positive, the Secretary may provide continued funding through the sixth year at declining levels.

(D) **Funding After Sixth Year.**—After the sixth year, the Secretary may provide additional financial support to a Center if it has received a positive evaluation through an independent review, under procedures established by the Institute. An additional independent review shall be required at least every 2 years after the sixth year of operation. Funding received for a fiscal year under this section after the sixth year of operation may not exceed one third of the annual operating and maintenance costs of the Center.

(6) **Patent Rights to Inventions.**—The provisions of chapter 18 of title 35, United States Code, shall (to the extent not inconsistent with this section) apply to the promotion of technology from research by Centers under this section except for contracts for
such specific technology extension or transfer services
as may be specified by statute or by the President, or
the President’s designee.

(d) Acceptance of Funds From Other Federal
Departments and Agencies.—In addition to such sums
as may be authorized and appropriated to the Secretary
and President, or the President’s designee, to operate the
Centers program, the Secretary and the President, or the
President’s designee, also may accept funds from other Fed-
eral departments and agencies for the purpose of providing
Federal funds to support Centers. Any Center which is sup-
ported with funds which originally came from other Federal
departments and agencies shall be selected and operated ac-
cording to the provisions of this section.

SEC. 403. PUBLIC–PRIVATE CLEARINGHOUSE.

(a) Survey of Existing Models of Interagency
and Public–Private Information Sharing.—Within
180 days after the date of enactment of this Act, the Presi-
dent, or the President’s designee, in consultation with sector
coordinating councils, relevant governmental agencies and
regulatory entities, and nongovernmental organizations,
shall conduct a review and assessment of existing informa-
tion sharing models used by Federal agencies.

(b) Designation.—Pursuant to the results of the re-
view and assessment required by subsection (a), the Presi-
dent shall establish or designate a facility to serve as the central cybersecurity threat and vulnerability information clearinghouse for the Federal Government and United States critical infrastructure information systems. The facility shall incorporate the best practices and concepts of operations of existing information sharing models in order to effectively promote the sharing of public-private cybersecurity threat and vulnerability information.

(c) **Information Sharing Rules and Procedures.** —The President, or the President’s designee, in consultation with sector coordinating councils, relevant governmental agencies and regulatory entities, and nongovernmental organizations, shall promulgate rules and procedures regarding cybersecurity threat and vulnerability information sharing, that—

(1) expand the Federal Government’s sharing of cybersecurity threat and vulnerability information with owners and operators of United States critical infrastructure information systems;

(2) ensure confidentiality and privacy protections for individuals and personally identifiable information;

(3) ensure confidentiality and privacy protections for private sector-owned intellectual property and proprietary information;
(4) establish criteria under which owners or operators of United States critical infrastructure information systems share actionable cybersecurity threat and vulnerability information and relevant data with the Federal Government;

(5) protect against, or mitigate, civil and criminal liability implicated by information shared; and

(6) otherwise will enhance the sharing of cybersecurity threat and vulnerability information between owners or operators of United States critical infrastructure information systems and the Federal Government.

SEC. 404. CYBERSECURITY RISK MANAGEMENT REPORT.

Within 1 year after the date of enactment of this Act, the President, or the President’s designee, shall report to the Congress on the feasibility of creating a market for cybersecurity risk management.
